Network RPA

Gluware Network RPA

The network needs to keep up with the pace of digital business. Network automation has become a business imperative for enterprises looking to ensure the highest levels of network performance while at the same time getting rid of repetitive time-consuming network management tasks and eliminating downtime caused by human errors.

Gluware Network RPA delivers end-to-end intelligent network automation in minutes, not months. Featuring a robust library of pre-built automated tasks, multi-architecture with over 40 vendor OS integrations, and drag-and-drop navigation, it's never been easier to get started or to accelerate your hyperautomation strategy.

Business Benefits

- Pre-built high-performance automation that works right out-of-the-box – no coding required; no programming skills needed
- Orchestration engine that brings disparate network management tasks together into multi-step automated workflow processes
- Multi-vendor architecture with over 40 integrations delivers a powerful and intuitive single pane-of-glass management console
- Drag-and-drop navigation makes it easy to use and easy to get started
- Built on Gluware's patented award-winning intelligent network automation platform
- End-to-end network automation in minutes, not months. Ensure the highest levels of network performance while eliminating human errors and freeing your teams of repetitive tasks

Key Differentiation

- No code really means no code
- Built-in intelligence using declarative and idempotent provisioning engine when making configuration changes
- Intent-based providing abstraction for user input, automation to implement the intended state and closed-loop verification
- Event-driven automation supporting native event detection and triggering (like via Syslog) or via 3rd party API integration using published RESTful API, GluAPI
- Gluware Service Connectors providing pre-built API integrations and Gluware Lab to provide low code ability to customize abstractions, business logic and 3rd party API integrations

Solution Key Features

- Easy to edit, manage, and monitor no code workflows using Gluware Workflow Editor, Library, and Activity modules
- Access to pre-built task-level operations from the Gluware application suite
- Integrated NetDevOps approach progressing workflows from test to production
- Private and public workflows with role-based access control (RBAC)
- More advanced trouble-shooting capabilities with aggregated device logs
- StackStorm integration expands the number of no code pre-built automated tasks available with integrations including Ansible, AWS, Azure, Jira, and ServiceNow Slack and more.
- Open architecture enabling customization of abstractions, tasks and 3rd party integrations using low code Gluware Lab
